

## **Caterina Davinio: Tecno-poesia e realtà virtuali**

### *Techno-poetry and virtual realities*

<http://xoomer.virgilio.it/kareninazoom/daviniobook.htm>

Contents:

International video-poetry, computer poetry, web and net poetry in the 90s (130 INTERNATIONAL ARTISTS + a special section dedicated to all the video compilations and festivals curated by Caterina Davinio the 90s).

**To order the book write to:**

**Claudio Preziosi**

**C/o Davinio Art Electronics**

**Via Sassi 10**

**23900 Lecco (LC) - Italia**

**A limited number of free copies for:**

**journalists, cultural centers, libraries,**

**archives, universities, etc.**

**ESSAY**

Language: BILINGUAL ITALIAN / ENGLISH,

**Publisher: SOMETTI, MANTOVA (I) 2002**

**Preface: EUGENIO MICCINI**

Collection: Archivio della Poesia del 900

Volume: 13-14

**pp. 320**

**ISBN 88-88091-85-8**

**PRICE: EURO 14 + mail costs**

**CONTENTS**

**Techno-Poetry and Virtual Realities.**

**History, Theory, and Experiences, in Writing, Visuality, and New Media**

- **A route in the 90s**
- **Video-performance and performance in video**
- **Videopoetry**
- **Video-Visual Poetry**
- **Computer poetry**
- **Hypertext, Hypermedia, Interactive Pages, Generative Writing**
- **CD ROM Poetry**
- **The Hypertext in the net. A performative attitude**

- Hierarchy, interactivity and collective creation
- Some common features
- Net poetry, e-mail poetry, SMS poetry and poetry in phatic function
- Art as communication and stratification of the virtual object. A concrete electronic data processing
- The object in the hypermedia and in the net
- Conclusions

**Artists' List:**

COMPUTER POETRY, HYPERMEDIA AND INTERNET

In this section there are artists and groups who produced hypertexts and hypermedia for CD-ROM or for Internet, generative writing, web projects or net poetry; authors are also included who realized digital visual poetry, animations and holograms using the computer.

CATERINA DAVINIO (Italia)

## PERFORMANCE AND PERFORMERS

(Performance in video, video-performance, computer performance, performance in Internet)

This section presents very heterogeneous artists referring to used media and research results, which go from the video document to low definition analog video, to digital elaborations, to multimedia performance, environments and installations, performances in Internet. The common aspect is the centrality

of the body and/or of the voice, of sound and gesture aspects of the concrete presence, even if some of the artists have realized also not-performative works.

TIBOR PAPP (Ungheria)

DMITRY BULATOV (Russia)

PHILIPPE CASTELLIN (Francia)

THANASIS CHONDROS E ALEXANDRA KATSIANI (Grecia)

RYSZARD PIEGZA (Polonia)

CHARLES DREYFUS (Francia)

MARK SUTHERLAND - NOBUO KUBOTA (Canada)

VIDEO

(Videopoetry, filmic poem an poem-video, computer video, video-visual poetry)

This part of the book encloses artists which have produced heterogeneous works regarding the techniques, which see a predominant use of audio-visual media in the form of the video, also digital, realized for the projection and for the installation.

ARIADNA CAPASSO, NORA CÉSAR, DAMIÁN KELLER (Argentina)

ANNA ALCHUK - OLGA KUMEGER - SERGEY LETOV (Russia)

## **APPENDIX**

In the Appendix can be found some of the projects and festival curated by Caterina Davinio in the 90s until 2002 (with all the names of participating artists).

- Art Electronics and Other Writings / Electronie d'arte e altre scritte, itinerant festival, 1994-95,
- After Electronic Art: the New Experimentation / Oltre le arti elettroniche, la nuova sperimentazione, Museo Pecci, 1995
- Electronic Poe(try)Visions / Poevisioni elettroniche, itinerant festival, editions: 1996, 97, 98, 2000,
- Virtual Words / Parole Virtuali 99 (48th Biennale di Venezia),
- Techno-Poetry 2001 (Le tribu' dell'arte, Galleria Comunale d'Arte Moderna e Contemporanea, Roma),
- Parallel Action - Bunker / Azione Parallela (on line) - Bunker Poetico (49ma Biennale di Venezia),

- Poetry Bunker / Bunker Poetico (100 experimental poets chosen by Karenina.it, 49th Biennale di Venezia),
- Global Poetry 2002 (net-poetry project, Giornata Mondiale della Poesia, UNESCO).

## **CREDITS**

Thank-you to everybody who during the years supported my work, to the artists included in this publication for the iconic and textual material necessary for the writing. José-Carlos Mariategui and CICV for the contents of Gianni Toti 's pages, Patrick Zanolli for the frame taken from Gramsciategui ou les poesimistes, Jorge Luiz Antonio, and Thomas Bell, for helping me in the English translation.

Special thanks to Eugenio Miccini, who wanted this book, first Italian publication dedicated to the research in electronic art connected with the experimental poetry and with its multiform language.

## **THE AUTHOR**

**Caterina Davinio** is computer artist, writer, curator. She studied Italian Literature at Roma University I "La Sapienza". During the 90s she organized festivals and meetings in many Italian cities, creating a bridge between the experimental poetry and the circuit of electronic art. She was one of the first poets who realized animated poetry with the computer in Italy, in 1990. Since 1998 her work appeared in Internet with collaborative projects, among them Karenina.it, become an international point of reference of poetry avant-garde. She presented world-wide her work in biennials and festivals (in more than 70 exhibitions), has published essays about new media poetry, catalogues, poems and computer poems, a novel (*Còlor còlor*, 1998). Present in hundreds of web pages and sites, among them "NY Art Magazine" and "Rhizome" (NY), and in art and literature experimental reviews (paper and software): "BoXon" (F), "Doc(K)s" (F), "Art on Line" (Brazil), "JavaMuseum" (D), and many others.

## THE LAST CHAPTER OF THE ESSAY

The effort, which was of the avant-garde, to bring poetry out from the page, drives it through the new media sea, taking it back to the oral and theatrical forms of the origins, of which could be possible to record in digital every visual, sound, kinetic aspect, and, otherwise, condenses the oral in the writing which is actuated by SMS, e-mail, mailing lists, chat lines; but the total liberation of the words risks to become a new captivity because of hyper technologies, able to produce an ambient-page in which texts, objects and experiences could be closed again. But neither the peculiarities of the electronic work as "in progress" object, nor the detachment originated by the interactivity as selection of the route, intrinsic to the hypertext, are able, as instead optimistically someone thinks, to make the user/reader protagonist, because an hedonistic fruition is accentuated by the spectacular nature of the hypermedia, of the total art-work, and by the awareness to act in the virtual worlds within the limits of a narrative pact without risks, or disseminated of false incidents like in the graphic of a videogame. In my lecture "Writing/Virtual realities", in November 2000,<sup>1</sup>[1] based on many of the contents proposed again in this essay, I asked to me, as already at the beginning of the 90s, if, optimistically certain that the new medium is just a new message, we would frequent the virtual worlds with the same "revolutionary" disposition of people who telephone to answer a television quiz or to choose the favorite song, considered that, if it is certainly true that the medium is the message, is worth the effort to become even certain that it is not a reactionary message...

Many years after the first experimentation in Italy of virtual reality in the fine arts, use that declared the death of the "representation", caused by the hypertrophy of the electronic image itself, it seems that only few initiated have realized the different nature of forms and visions in circulation in the media world, and the experimental poets are called to enter the field again to defend the word from the restoration of the page - also if it is presented in the attractive

---

and ambiguous possibilities made available by the hypermedia - from the transposition in digital of images, texts and even avant-garde and neo-avant-garde performances.

The present study, exploration of what is emerged or is appearing in the Italian and international landscape, contribution to the debate, under way also in the visual arts, is born with the aim to bring clearness in the experimentation area, generically defined for more than a decade "videopoetry", and in the more recent field of what is called "net-poetry" only because published in Internet, place in which are converging products derived from opposite art theories and processes, condensed in identical digital objects, which finally come into the same circuit of festivals, dense of contrasts and of apparent similarities. The myopia of curators and critics towards a world that changes too quickly to allow also a turnover in the top level of the culture, a world characterized not only by the use of technologies in the arts, but by a multiplicity of experiences and angulations from which is possible to watch them, has a reason: the not much sincere interest in the electronic poetry, as generally known, a non lucrative field, as every kind of art based on virtual actions, on e-mail exchange or files that everybody can clone and modify.

Some artists posed the problem and tried to protect their sites, to sell them to canonical institutions, as the museums, allowing the access by payment, missing the original spirit of an art that had as bases opening, participation, capability to go through and to be crossed from realities and experiences; there is who, on the opposite front, theorizes the end of the individuality of the author, takes up a position against the copy right, in favor of the anonymity, of the hacker action and, as provocation, of the plagiarism.

For what concerns specifically net poetry, paradoxically contributes to the distortion of its meaning the growing curiosity it arouses and its presence in festivals that deal with something other: in the field of literature, today as yesterday, with reading of "paper"-texts and with performances that see on stage the same performer of ever, in traditional shows on which multimedia are superimposed, very far from the pure gesture, from the vocal expression of the origins, from the nude and crude glottides movement of the sound poet, who, with the virtuosity of his own uvulas deal definitively a blow to a poetry made of symbolic language, to stretch the primary energy of the voice, as an extension of the body, toward the spectator, without going through

the lexical and syntactical mind. If we go deeply into the mechanisms that give life to that process, we are not very distant from the light (and "phatic") touch of the mouse button that allows to us to reach someone who lives in the opposite hemisphere of the planet and to do "poetry" without going through the reasons of literature.

I never deeply believed in the innovative capability of an egocentric scenic presence of the performer in the performance, no matter if surrounded or not by technologic sceneries, because I thought, since the beginning of the 90s, the idea of presence was put in discussion by the dematerialization and dislocation, to whom the virtual reality and the web force the body.<sup>2[2]</sup> And, also as an artist, I routed a new notion of presence, based on "remote" poetry actions, realized in collaboration with groups and single artists.<sup>3[3]</sup>

I think, in short, that the antidote to the false revolutions is to begin not from the enthusiasm for the future, but from a re-reading of a past which is still living in the present: the lucidly desecrating poetry that in the 60s faced the mass society, the advertisements, by assuming in an unexpected and polemic way their stereotypes, by actuating a continuous meta-linguistic somersault, breaking the poetic aura - of which, everyday more, digital works in high definition are surrounded -: the discourse became fragmented, the grimace was exasperated, deformed, contaminated with not verbal elements, producing the visual, sound, performative poetry, ambient/installation-poetry, created by artists, really so different from each other, as Mirella Bentivoglio, Julien Blaine, Tomaso Binga, Eugenio Miccini, Luca Patella, Lamberto Pignotti, and many international others, who have developed, in an original and differentiated way, experiences by Fluxus, conceptual art, concrete poetry and Lettrism.

What I tried to do, in Internet and out, was to create a bridge between the experimental poetry and the electronic art, that at the end of the 80s in Italy was still independent video, and in the 90s gradually became digital video, computer art, CD art, web art, net-art, with everything that the disloc/action of the body in the net brings in the notion of performance.

---

It is anyway in front of everybody that the "visual" have become the kingdom, if not of the ugly, at least of the worrying, of what appears not adapt to an hedonistic fruition, and arrives to a negation of the visual self, forcing us sometimes to the unpleasant - the aim is really other than the one to *épater le bourgeois* of the avant-gardes: are aware, the artists, to be not in front of a generic public of conformist burgers, but in front of shrewd experts not ready to be scandalized by something - the ugly and the unpleasant as disturb elements in the communication, able to produce communication following an internal logic proper of the process; this happens while the world of the advertising and of commerce, of which the visual and performative poets mimicked the low register and the rhymes, appropriated itself, with few exceptions, in a persuasive way, of an electronic esthetics devoted to the formal perfection, to the digital sharpness. From this fact we should really draw our own conclusions.

For not returning back to a re-codification of the "fine" is necessary to place a limit between the "concrete" electronic image, net-poetry, and what, on the contrary, are the archives of digitalized art, the magazines and reviews on line, the pointless animation games, the interactive machines which take possession of our monitor to surprise us with special effects, the run-up to the up-to-date graphic software.

The net-artists experiment with a very heavy substance, more heavy than marble and than bronze, the one of the communication flux, going into the heart of the digital language and in the grammar of the software, to force them towards distorted finalities compared to those one for which they were planned. The difference between "electronic image" and "concrete electronics" can be than observed contemporaneously at a level of formal choices, which we have examined, characterized by the accentuation of the relational and an-iconic aspect, and in the field of the contents, where the theoretical discourse has overwhelmed the production of visible forms and the critic seems to have won the match against art, theory merges itself with the esthetic element and substitutes it, but also celebrates the emancipation of the artist-writer from the criticism, and the achievement of an art based on the word.

The considered accentuation of the relational and an-iconic factor brings the work to be contaminated with the society, with politics, and, in the opposite field, to valorize the function of the language,

that Jakobson defined "phatic", aimed to keep open and operative the channel between sender and receiver, to verify its functioning. The vocation to the hypertrophy of the communication and at the same time to its annulment can be perceived in many mailing lists, news letters, forums and news groups promoted by artists and poets, above all in the use that of them is made, objectively devoted to realize the contact more than to transfer real information: apart from the emblematic example of the SMS, everyone can experiment how, by managing a great number of e-mail messages, the reading is generally conducted randomly and very often abandoned after few lines.

Finally, the knowledge of the rules of the "electronic" game can avoid the net to become a place of mere accumulation and conservation. The invoked participation of the viewer and opening of the work are generated effectively not only, as someone means, by intrinsic qualities of the electronic art, but through the collision with "anomalous" "unidentified" objects of poetry, constructed by web poets, of which this book presents a very rich and various catalogue; through the healthy jolt provoked by these wandering mine in the media sea, but also with all that, as history, art and criticism, there is behind, maybe it is possible to awake the viewer, our self, from the wonder, and to recompose the sense of the discourse in the disloc/actions in the virtual spaces, a meaning that starts again from the relationships between persons.
